

OVERVIEW

UH SERIES

#### CHARACTERISTICS:

UH series ventilation extract grilles with fixed blades

Frame: extruded aluminium rounded corners; it's constituted from 4 assembled parts.

**Blades:** extruded aluminium with 20 mm as distance between the centres. **Transversal reinforcement:** foreseen only for grilles with size upper than 600 mm.

Damper: galvanized sheet steel, contrast blade motion.

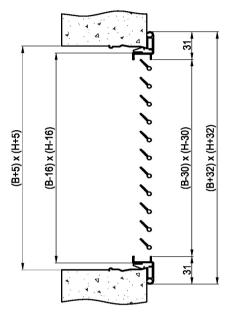

Mounting frame: galvanized sheet steel suitable for installation with screws on frontal side or with clips.

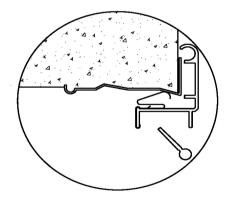

Installation on wall: by screws, by clips and mounting frame (without screws), with screws directly on the duct or on the wall, by clips or screws directly on the plenum.

Finishing: anodized aluminium or painted aluminium with colour white RAL 9010 (epoxy powder treatment).

### UNSUITABLE ENVIRONMENTS

The aluminum products are not suitable for installation in environments with an atmosphere containing corrosive substances for this material and in particular containing chlorine, such as swimming pools, spas and some types of food industries.

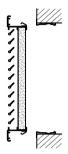

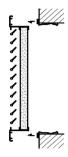

### FILTER HOLDER

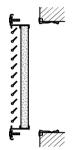

## UH SERIES

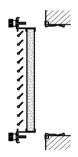

with rigid filter fixing both sides with clips Installation on wall, not ceiling-mount

with rigid filter fixing both sides with magnets Installation on wall, not ceiling-mount

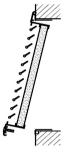

with rigid filter fixing both sides with screws Installation on wall or ceiling

with rigid filter fixing both sides with knobs Installation on wall or ceiling

with rigid filter fixing hinge and magnets Installation on wall, not ceiling-mount

with rigid filter fixing hinge and screw Installation on wall or ceiling

with rigid filter fixing hinge and knob Installation on wall or ceiling

Rigid filter with steel frame, 15mm thickness Filtration class G3

### CONTROL DAMPERS

SC SERIES

## OVERVIEW TECHNICAL CHARACTERISTICS

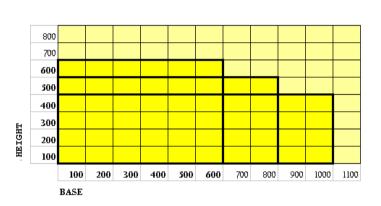

## **OVERVIEW AND CHARACTERISTICS:**

The contrast control dampers of SC series can be fitted to UF KG UM UR GI KN e CR-KN series . They are held in place by special patented clips, designed both for fitting the damper to the grill and for fitting it on a false frame.

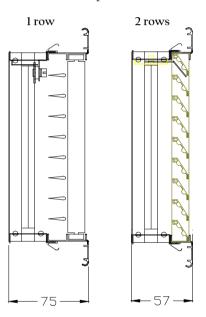

The SC series dampers are made entirely of galvanised steel and have a mechanism for moving and closing all the blades simultaneously.

This mechanism is a simple longitudinal plate that links all the blades, and can be removed by unscrewing a nut using a screwdriver. The careful design, precise assembly, and the quality of the materials used, make this an economical, practical, and efficient component.

## Contrast control damper- dimensions that can be created in a single solution

Contrast control damper -detail of patented fixing clips

## COUNTERFRAMES FOR SUPPLY AND RETURN GRILLES

**OVERVIEW** 

UTC SERIES

#### **OVERVIEW**

The UTC series counterframes used for supply and return grilles are a strong frame on which the fixing clips can rest. They are required if the grilles need to be frequently removed for cleaning, inspection, filter changing and other similar jobs.

The UTC counterframes can be installed both next to steel ducts and on masonry walls.

Bendable parts are placed inside the fixing agent of the wall and a frame that will be completely hidden from the frame of the grille itself, for fixing by means of screws or rivets to the duct wall.

The use of the counterframe on the side of the steel duct allows the use of grilles with fixing clips rather than with screws, therefore allowing to undertake jobs that require removing and reinstalling the grille with the up most simplicity without the need of tools.

The use of the counterframe on masonry walls allows for an almost unlimited number of removals and replacements of the grille without ever damaging or wearing-out the border of the hole made in the wall. The position of the grille can therefore be maintained, precise and secure.

#### TECHNICAL CHARACTERISTICS

The UTC Series counterframes are made of four separate parts, of galvanized carbon steel sheet,

fixable to each other without the need of tools. The parts are completely interchangeable as the particular system of connection eliminated the need to distinguish between horizontal and vertical parts and with between left and right parts.

As shown in the illustration, the necessary space for the counterframe needs to be 5mm more than the nominal size of the grille.

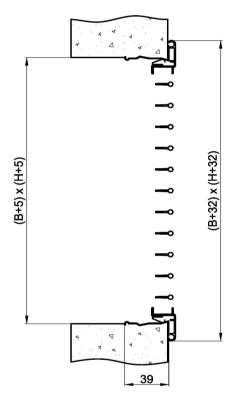

The parts are supplied unassembled, the complete interchangeability helps to easily manage the parts kept in stock.

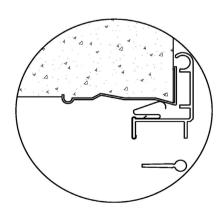

### AVAILABLE SIZES

The available sizes for each part range from 100mm up to a maximum of 1400mm, in multiples of 50mm.

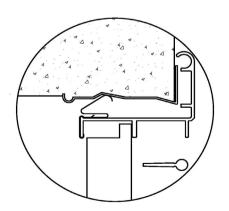

Special sizes are also available on request.

By composing the various sizes, all the necessary sizes are achievable.

Mounting with single deflection grille

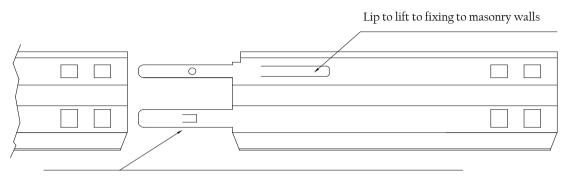

Mounting with double deflection grille

## **COUNTERFRAMES FOR SUPPLY** AND RETURN GRILLES

UTC **SERIES** 

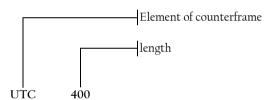

**OVERVIEW** 

blades to bend at  $90^{\circ}$  and insert in the attachingpart to assemble the counterframe

### Detail of the fixing method between parts

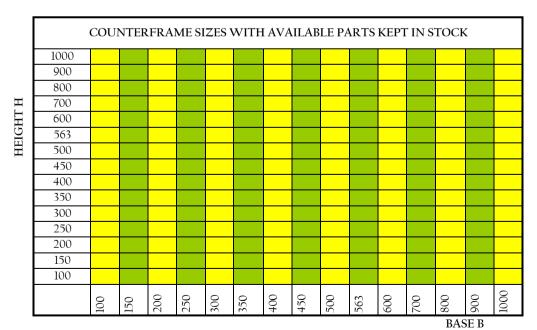

This system allows to quickly assemble the counterframe, even during the construction fase.

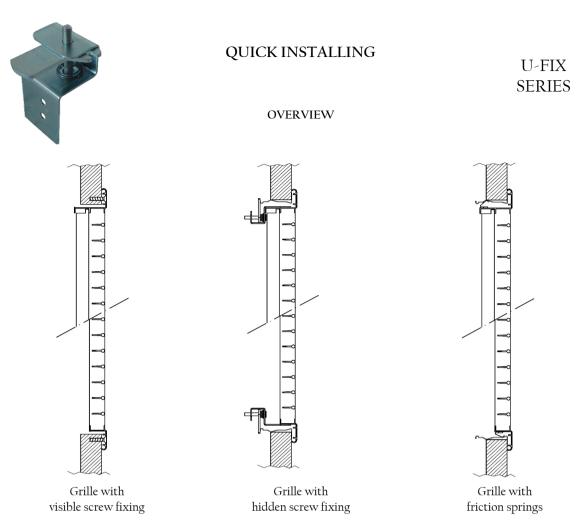

To order a counterframe for a 400x200mm grille,

request: UTC-400 - 2 pieces UTC-200 - 2 pieces

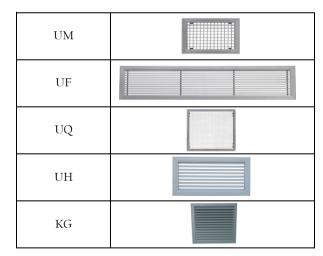

To order a counterframe for a 300x300 grille, request: UTC-300 - 4 pieces

The 563x563 size is for grilles with a 595x595mm outside frame measurement, used for modular counterceilings.

All the fixing metods are avaiable for all the models of grille, with one or two rows of fins

### New fixing with hidden screw

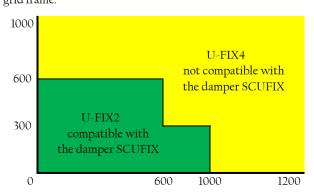

The new U-FIX kit allows a quick fixing of the shown grids to the counterframe simply rotating a hidden screw behind the front fins.

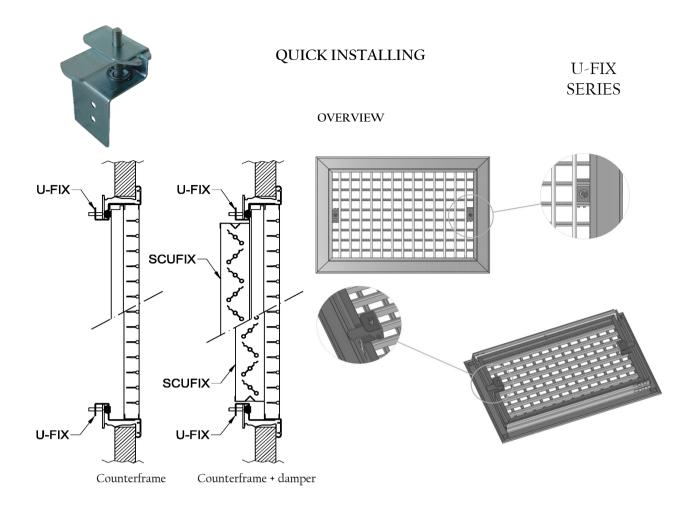

The kit is suitable for grilles with two rows or a single row of fins.

This solution allows you to quickly disassemble and reassemble the grid for any cleaning or maintenance.

The kit consists of two or four hardware, depending on the size of the grid.

The kit comes already assembled on the grid. For the sizes up to 1000x300 and 600x600 it is possible to provide an SC damper mounted during manifacturing on the grid frame.

### HOW TO ORDER

The code of the grid must be with "clips configuration" (not with "holes configuration"). Standard clips will not be provided in presence of U-FIX kit mounted. The counterframe must be ordered according to standard counterframe dimension. In case of regulation damper request, please use the specific code SCUFIX

### ORDER EXAMPLES
